Rehab Practice Management, LLC Purchases OrthoSport Health Center

NASHVILLE, Tenn., February 12, 2010—Rehab Practice Management, LLC announced today that it has acquired OrthoSport Health Center, an outpatient clinic provider of Physical Therapy and Pilates services. Terms of the transaction were not disclosed.

Rehab Practice Management (RPM) CEO, John Hawes, commented: “We are pleased to add this innovative outpatient clinic to our platform. OrthoSport is a highly regarded provider of outpatient therapy services in the San Diego area. With its 20 year history in the market, it has a well-established reputation for quality service and strong referral relationships. The Pilates services provided by the clinic are a unique and sound extension of the clinic model and its staff. This acquisition fits squarely into our strategic plan of building regional market density through complimentary service lines and locations. It is consistent with our approach of focused, managed growth and balancing assets among our contract services and owned clinic operations.”

Rehab Practice Management, headquartered in Franklin, TN, provides rehabilitation management and therapy services to hospitals and operates wholly owned outpatient clinics in markets non-competitive to its hospital customers. The company was formed in 2004 with 4 locations in California and now has 20 locations in 4 states.
